Environment Policy Commitments

『 Focus on the environment, sustainable management 』

Our commitment:

Compliance with regulatory requirements:

Compliance with government regulations such as environmental protection and other requirements.

Universal awareness of environmental protection:

Communicate environmental policies to all organizations or their representatives to recognize individual responsibilities and promote participation in the implementation of environmental management systems.

Enhance communication and coordination:

Enhance interaction with employees, people, suppliers and stakeholders, establish channels for communicating environmental policies and related information, and provide appropriate responses and disclosures.

Reducing the impact of pollution:

Implement pollution source management, implement activities such as waste reduction, energy conservation, resource utilization, reuse, clean production and greenhouse gas emission inventories to mitigate the impact on the ecological environment.

Promote green procurement:

prioritize the procurement of green raw materials, establish green procurement mechanisms and supply chain management, and encourage suppliers to reduce waste of resources and reduce pollution.

Continuous prevention and improvement:

Planning and operating environmental management system, aiming at pollution prevention, setting environmental goals and plans, meeting environmental policy requirements, and achieving continuous improvement.
